

Hand Dispenser, Eppendorf

① Hand dispenser Multipette® plus

Allows outstanding flexibility. The Combitips are replaced in the blink of an eye and the handling is more than kind to your hand and thumb muscles.

- Combitip recognition with volume display
- Safety through high dosing accuracy
- Up to 100 dispensings per filling for easy processing of long series
- 112 different volumes, including „non-standard“ volumes (e.g. 1 µl, 3 µl and 17 µl)
- Easy, adjustable selection of volumes from 1 µl to 10 ml
- Easy, contact-free Combitip attachment
- Two-year warranty

Box with sliding lid for storing up to 10 Combitips plus 0.1 ml to 10 ml

② Electronic hand dispenser Multipette® stream and Multipette® Xstream

The Multipette stream and Xstream are the first electronic hand dispensers which combine easy handling with a broad function range. The Multipette stream is suitable for all standard applications; for high-end applications such as titration and sequential dispensing, the Multipette Xstream would be the first choice. Together with the Combitip plus system, it represents an essential laboratory tool for all applications.

Application

- Electronic dispensing with memory function
- Contamination-free dispensing by means of the principle of direct displacement
- Ideal for viscous solutions (e.g. glycerol, oil) or liquids with high steam pressure (e.g. acetone, ethanol)

Product features

- Dispensing and pipetting in direct-displacement mode
- Automatic dispensing
- Quick and ergonomic with motorised piston operation
- One-button tip discard
- Lithium-ion-battery
- Function-selection wheel for dispensing mode
- Automatic Combitip-recognition
- IvD-conformity
- Volume range 1 µ - 50 ml
- Two-year warranty
- Charging possible during operation

Additional product features of the Multipette XStream

- Suction cleaning of supernatant liquids
- Titration
- Sequential dispensing
