

Precision Balances CA Series, Phoenix Instrument

The CA series was designed and produced to operate reliably and fast in various, also complicated environments.

Other features of the CA series:

- Calibration via push of a button with external calibration weight
- Measuring time 2 to 3 seconds
- Elegant, very robust ABS housing
- Shield comprised as a standard (only with 0.001 g and 0.01 g balances)
- Comfortable and easy operation via keys
- Stainless steel scale
- Very efficient overload protection
- Various application programs (weighing, counting, percentage weighing, conversion in other units)
- Bi-directional RS232 interface
- Balances can be stacked
- 2 years warranty
- Battery operation possible
- All balances come with water level and adjustable feet

Type	Increm. g	Weigh. range g	Platform mm	Order No.
CA-103	0.001	100	120	10 13 70103
CA-802	0.01	800	120	10 13 70802
