

Laboratory Cart, WINLAB®

WINLAB®

Extremely sturdy, versatile laboratory carts made of aluminum profile.

High carrying capacity and sturdy design thanks to the highly stable aluminum profile with 40 mm high edges. The castor sets - two castors per cart can be locked - are likewise dimensioned for heavy loads (max. 125 kg per castor). The universal cart and the cart with PP top have a handle on the side for easy guiding.

Custom-made carts with the dimensions of your choice are available!

Select from the following variants:

- Equipment and laboratory carts with polypropylene tops (PP)
- Equipment and laboratory carts with melamine tops
- Universal carts (replaceable baskets and/or transport tubs)

① Equipment and laboratory transport carts with shelves made of polypropylene (PP)

As PP is highly resistant to chemicals, this tabletop variant is particularly well suited for transporting laboratory materials. The tabletops are recessed in the frame so that an all-round border prevents the transported material from falling off.

Carrying capacity of the cart: approx. 250 to 300 kg

Overall height cm	Useful area width cm	Useful area depth cm	Order No.
75	65	45	10 03 10201
75	75	55	10 03 10202
90	95	60	10 03 10203

② Equipment and laboratory transport carts with shelves made of melamine

This variant can be used in many laboratories for transporting equipment and lab materials as the tops are highly resistant to chemicals, comparable to the tops of laboratory furniture.

Carrying capacity of the cart: approx. 250 to 300 kg

Overall height cm	Useful area width cm	Useful area depth cm	Order No.
75	90 (1. shelf)	75 (1. shelf)	10 03 10221
	75 (2. shelf)	60 (2. shelf)	
90	120 (1. shelf)	75 (1. shelf)	10 03 10222
	100 (2. shelf)	60 (2. shelf)	

③ Universal cart

For transport baskets made of coated wire and/or synthetic transport tubs (60 x 40 cm).

Overall height cm	Useful area width cm	Useful area depth cm	Order No.
85	70 (outer)	50 (outer)	10 03 10231

Baskets and tubs for universal cart

Wire baskets with white synthetic coating, mesh width 8 mm, wire thickness 1 mm, basket size 60 x 40 cm, ideal for transporting laboratory glassware.

Synthetic transport tubs (PP) with integrated handles, 60 x 40 cm.

Article	Height cm	Volume approx. l	Order No.
Wire basket	26		10 03 10241
Wire basket	11		10 03 10242
Tub	20	38	10 03 10238
Tub	25	48	10 03 10248
Tub	40	80	10 03 10280
